Continuing Maintenance of P. Ponk Landing Gear Parts

PPA1201 Angle

PPA1301-1 and PPA1301-2 Outboard Brackets

PSK1101-1 Main Landing Gear Attachment Blocks

Parts should be inspected at every Annual Inspection (or immediately following a “hard” landing) for security of attachment, cracks, metal distortion, corrosion, condition of coatings, and any other apparent damage.

Any defects noted should be resolved per the Cessna Service Manual for the aircraft the parts are installed in, or the parts should be replaced.
