

Several Good Tailwheel Assembly Videos

These videos are available on YouTube. While shown on an Alaskan Bushwheels' "Baby Bushwheel" (wide) tailwheel assembly, our Scott 3200 / 3224s are identical except for the width of the fork. The three videos are worthwhile, in my opinion. One video also shows the new style of grease seal ABI came up with; for the axle and for the bottom of the center shaft. These videos are being done by someone from one of the type clubs - the Piper Short Wing Club.

Disassembly:

Setup of Chains/Springs (on a Maule w/compression springs). Our tension springs run a bit tighter, but concept is similar:
